Fausto Carrera

Senior Software Architect at Hexacta
Argentina

Summary

Linux enthusiast and back-end developer for a wide variety of business applications and industries. Particularly interested in micro services and containers and how to improve the back-end with that tools, with a passion for scripting and automate processes. I am working with Linux, Python, JSON, PHP, SQL, NoSQL, and bash on daily basis, mainly focused on REST API's and micro services using python and/or PHP.

I have worked with several development teams as Scrum master, in charge of the whole process, and being part of the high-level decision making with the client, the PM and the PO.

With great understanding of the relationship between the software development cycle and the company's business model, we could make a better choice of milestones, priorities and investment of time, avoiding the risk of missing important deadlines.

Key traits:

Project management (time, budget and resources estimation).

Demand management.

CI/CD automation: with different tools including TFS, Jenkins and CircleCI.

Containers: Docker

Agile methodologies: Scrum, Kanban, XP.

I could work under pressure, but I prefer to do better time/resources estimation in the first place.

Extensive experience dealing with clients.

I prefer to work with a team than be a one-man army.

Key soft skills:

Negotiation

Communication

Selling

Open-mindedness

Team management: leadership/mentoring

Specialties:

TDD

Python

Bash

PHP

Databases:

Relational: MySQL, SQLite, PostgreSQL, Oracle, SQL Server

No relational: Couchbase, Cloudant, Redis

OS:

Linux Debian/Ubuntu/CentOS

Windows

Version control systems:

GIT

Development Frameworks:

Flask

Django

Symfony

Laravel

Infrastructure:

AWS

Puppet

Docker

Messaging:

RabbitMQ

Interests:

I am always looking for a better way to do my work; I spent most of the time coding new stuff or refactoring my old code

Hobbies:

Swim

Bike

Run

Personal:

https://medium.com/@__fcf__

If you are a recruiter and really looked into my profile, I'm not a full stack developer, html, css and js is not something I want to work on.

Experience

Hexacta

7 years 2 months

Senior Software Architect

December 2020 - Present (1 year 10 months)

Buenos Aires, Buenos Aires Province, Argentina

Lead multiple teams in different clients, in charge of managing technical support of the projects and technical decisions in my own team (architecture, integrations with external systems, etc).
